Freedom Scientific's

SARA™

Scanning and Reading Appliance

Effortless, affordable reading of books and everyday documents.
Freedom Scientific's **SARA**™ (Scanning and Reading Appliance) is an affordable and easy-to-use solution for reading a wide variety of printed material, including books, mail, newspapers, magazines, and so much more. **SARA** uses the latest in advanced optical character recognition technology to scan text and then read it aloud in crisp, clear speech. **SARA** automatically stores and remembers the contents of hundreds of thousands of scanned pages.

Start reading right away.
You can start using **SARA** right out of the box, with no experience or training. Just place your book or document on the scanning area, and press the scan button. **SARA** automatically scans and recognizes the text and reads it to you. During the reading, you can adjust the voice rate and volume as well as fast forward and rewind.

If you want to take time and examine a document in detail, simply pause the reading and use the intuitive navigational keys to read a word or a line at a time. You can even spell out words to get a better understanding of what is being spoken.
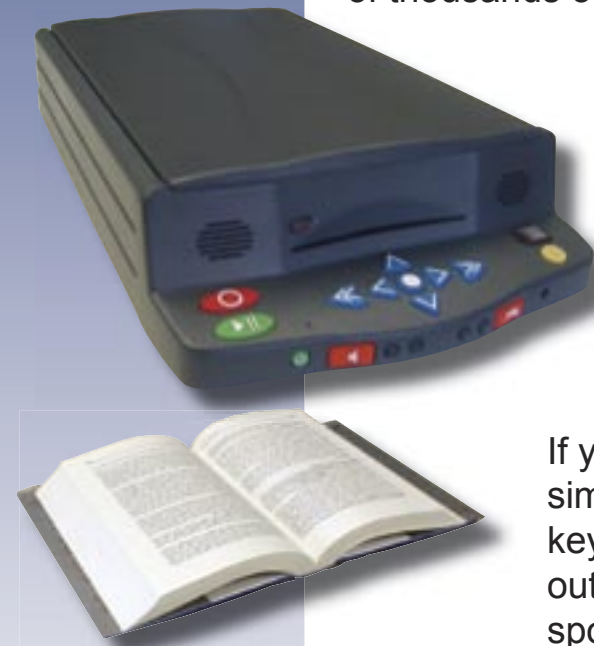

If you need assistance, you can use the Help button to quickly remind yourself of any button's function. For more assistance, **SARA** includes helpful manuals and complete documentation.

Choose your preference.
SARA is designed with both the practical and leisure needs of the blind or low vision user in mind. You can customize the speech rate, volume, and type of reading voice from **SARA's** built-in RealSpeak™ synthesizer to suit your particular needs.

For the low vision user, **SARA** can be attached to a TV or computer monitor, providing colorful, large print access to complement speech. You can even change the print type style, color, size, and spacing to fit your needs.

Whether you're enjoying the latest best seller or studying a complicated insurance policy, Freedom Scientific's **SARA** makes reading a breeze.
