

Introducing MAGic® Pro Scripting Edition!!!

What makes MAGic Pro Scripting Edition different from MAGic Professional with Speech?

MAGic Pro Scripting Edition is pre-authorized for remote access, using Citrix and Terminal Services, and it also includes the ability to create and run custom scripts. By using scripts, you are able to modify MAGic's behavior in any application, increasing flexibility and enhancing productivity.

What is included in the Pro Scripting Edition?

The Freedom Scientific Script Manager and full scripting language are included with the program. The scripting language, traditionally used by JAWS®, has been expanded to provide new functions for directing visual focus and utilizing MAGic specific features. The Help menu of MAGic provides easy

access to script documentation including the Freedom Scientific script manual, Freedom Scientific Developers Network, and online help.

What is the difference between MAGic and JAWS Scripts?

In addition to getting great speech when you need it, in any application, you can now use scripts to direct the visual focus to enhance the user experience.

Introducing MAGic[®] Pro Scripting Edition!!!

Can anyone run scripts created for MAGic?

Both creating and running custom scripts require MAGic Pro Scripting Edition authorization. Once you are authorized for MAGic Pro Scripting Edition, you can create, run, and share your scripts with other MAGic Pro Scripting Edition users.

Can MAGic and JAWS share scripts?

The same scripts can be used by both JAWS and MAGic users. Scripts can be designed to include enhancements to both speech and visual tracking as well as provide different experiences for the speech only users and the magnification users.

Are there examples of how this new scripting capability can enhance the user experience?

People who have already created special applications for JAWS are now creating similar applications for MAGic users. Typing Tutor from Yes Accessibility has already been released for MAGic users.

T&T Consultancy, developers of J-Say are creating a MAGic version to combine MAGic with Dragon[™] Naturally Speaking[®].

How can I upgrade my current MAGic to MAGic Pro Scripting Edition?

Any current version of MAGic can easily be upgraded to the MAGic Pro Scripting Edition through Internet License Management (ILM). Once authorization is updated, the new functionality will be immediately available for use.
